# A Tale of Two Seasons (6.8.B.7.4)

Illustrative Mathematics

7.4: A Tale of Two Seasons

The two histograms show the points scored per game by a college basketball player in 2008 and 2016.

1. What is a typical number of points per game scored by this player in 2008? What about in 2016? Explain your reasoning.
2. Write 2--3 sentences that describe the spreads of the two distributions, including what spreads might tell us in this context.
